PER SCHOLAS

GLAB 928.1 - Crafting Effective AI Prompts for Business Insights

Version 01, Date 09/17/2024
Open in new window

Introduction

This lab focuses on creating effective AI prompts to generate valuable business insights, ensuring precise and actionable outputs that drive decision-making and strategic planning.

Objectives

By the end of this lab, learners will be able to:

- Analyze an existing prompt to assess its effectiveness.
- Identify areas for improvement based on specific guidance principles.
- Refine the prompt to improve its effectiveness in generating actionable business insights.

Learners will develop prompts that clearly guide AI to produce insightful, relevant, and actionable business reports, enhancing strategic decision-making processes.

Equipment

Access to an AI prompt generation platform.

Submission

Please use this perscholas template to submit the refined prompt, including details about specificity, context, and desired output format by compiling the answers and screenshots in a PDF file. Click the "Start Assignment" button to share your enhanced prompt designed for generating business insights.

Instructions

Note: Tasks below have some examples mentioned for your reference. Please, feel free to use your own examples while practicing.

Task 1: Analyzing an Existing Prompt

TO-DOs - 1:

Analyze the given prompt:
"Generate a comprehensive report which analyzes customer feedback."

Evaluate the prompt based on:

- **Desired Output:** Provide a critique of the prompt based on its specificity, context, and desired output format. Identify areas where the prompt could be improved to better guide the AI.
- **Instructions:** Write a detailed evaluation of the prompt, noting its strengths and weaknesses in each of these areas. Indicate what additional details might be needed to enhance the prompt.

Task 2: Refining Specificity

TO-DOs - 2:

Refine the prompt to make it more specific by incorporating detailed business-related information. Enhance the prompt to include specifics such as the time frame for the feedback, particular areas of the product being evaluated, or the types of feedback being considered.

Prompt Example:

- "Generate a comprehensive report on customer feedback which analyzes customer feedback collected over the past six months, focusing on feedback about our new mobile app's user interface and checkout process."
- **Instructions:** Rewrite the original prompt to include more specific details. Provide a revised version of the prompt and explain how these changes help narrow down the focus and guide the AI to generate a more targeted report.

Task 3: Adding Context

TO-DOs - 3:

Provide additional context to clarify the purpose and intended use of the report. Add background information that explains why the report is being generated and how the insights will be applied. This might include details about the business objectives, strategic decisions, or areas for improvement based on the feedback.

Prompt Example:

- "Generate a comprehensive report on customer feedback which analyzes customer feedback collected over the past six months, emphasizing issues related to our new mobile app's user interface and checkout process. Include recommendations for improving user experience and strategic planning."
- **Instructions:** Revise the prompt to include relevant context. Describe the purpose of the report and how the insights will be used. Provide a revised prompt and explain the added context's role

in improving the AI's output.

Task 4: Specifying Desired Format

TO-DOs - 4:

Define the preferred format for the output to ensure that it meets business needs. Specify the type of report required such as a summary with key findings, a detailed analysis with charts and graphs, or a presentation-ready document. This will help the AI understand how to structure the information effectively for the intended audience.

Prompt Example:

- "Generate a comprehensive report which analyzes customer feedback collected over, with actionable insights and visual charts on customer feedback, formatted for a presentation to the senior management team."
- **Instructions:** Adjust the prompt to specify the desired format of the output. Provide a revised version of the prompt that includes format requirements and explain how these specifications help the AI produce a more suitable report for the intended audience.
